FROM FRIENDSHIP CENTRAL SCHOOL SUPERINTENDENT JUDY MAY:

Dear Families:

In the coming days, school districts will be receiving an allotment of rapid home tests that New York State has purchased for distribution to our families. These tests are being provided to help our District achieve the goal of keeping our children in school. The testing kits will be shipped to CABOCES from where they will then be distributed to each school district for distribution. The Governor is asking that these tests be available to families interested in home testing their child(ren). Our intent is to provide these to you as soon as we receive them. The exact date will depend ultimately on when our shipment is received from the State.

To be clear, there is no requirement that families test their children with these rapid home test kits, however, the State is encouraging families to do so, as needed, to help keep children in school.

To ensure that these home test kits are delivered to all students' families that would like one, please contact the Nurse's Office at 585-973-3560 and leave a message if you would like to receive the home testing kits for your child(ren). You can call anytime to leave a message.

Thank you for your continued support through these ever-changing regulations and in ensuring that we create the safest school environment for all students to learn.

Sincerely,

A handwritten signature in blue ink that reads "Judy L. May". The signature is written in a cursive style with a large, flowing "M".

Judy L. May
Superintendent
